

Special Issue

Paradigms, Practices and Policies to Foster Sustainable and Meaningful Careers

Message from the Guest Editors

Dear colleagues, The recent scientific literature shows the wide and frequent use of the term “sustainability” in the fields of work and organizational psychology, vocational psychology and career counseling. Future research is needed to achieve a more comprehensive and integrated understanding of it from micro (i.e., individuals behaviors and needs), meso (i.e., organizational and institutional roles) and macro (i.e., national and international policies and incentives) perspectives. To address such needs, this Special Issue invites the submission of high-quality conceptual and empirical papers in order to investigate the complementarity of these various conceptualizations and bring empirical support to them. In summation, this Special Issue puts the focus on:

- Sustainable development of individuals through life-long education
- Career choices in line with a fair and sustainable development of our societies
- Career interventions aiming to facilitate equal access to decent and meaningful work
- Organizational interventions promoting employees' well-being and sustainable careers
- Public policies and labor market measures to foster sustained employability

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
