Socioeconomic Approaches to Sustainable Development of Real Estate Markets—COVID-19 Pandemic Lessons

Message from the Guest Editors

The growing safety requirements and rapidity of introducing new technologies to all aspects of residents' lives have forced real estate markets to shift from “smart city” concepts to “safe city” concepts. For that reason, more research on socioeconomic approaches to the sustainable development of real estate markets is needed. In this context, this call for papers aims to attract high-quality papers on this issue. Examples of topics include:

- new directions for sustainable development of the real estate market,
- challenges for multidisciplinary analysis of real estate markets due to COVID-19,
- utilization of new technologies for supporting sustainable socioeconomic approaches,
- information technology requirements in the COVID-19 reality,
- COVID-19 disruptions of socioeconomic sustainability and their avoidance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
