Optimal Decisions in Sustainable Supply Chains Impacted by Health Crisis

Message from the Guest Editors

Due to the serious health crisis (i.e., the COVID-19 pandemic), almost all countries in the world have adopted strict containment measures, by confining people to their homes. This has disturbed national and global supply chains. Indeed, almost all supply chain firms have experienced difficulties, such as a brutal increase in the consumption of certain types of products, and a decrease in demand for other products, lack of workforce and of raw materials, and an increase of home delivery orders. In light of this situation, authors are invited to submit high-quality research papers on the subject of decision making in sustainable supply chains during the health crisis, or after the epidemic's peak (containment exit). Research related to the keywords below is welcomed.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
