

Special Issue

Twin Transition: Impact, Challenges, Management

Message from the Guest Editor

Twin transition may be the key to transforming industrial value chains with the aim of minimizing waste and pollution. The digital and green transition of organizations is crucial for the environment, for business development and for the shift to circular economy. Innovative management approaches, methods, and models still need to be investigated and proposed for better performance. In the European research and innovation funding programme 2021–2027, Horizon Europe, technologies are prioritised: advanced manufacturing, advanced materials, life-sciences technologies, micro/nano-electronics and photonics, artificial intelligence (AI), and security and connectivity. However, business and industry change is complex and full of process uncertainties, and requires a socially responsible and innovative approach. We welcome the contribution of studies on innovative technologies, social innovations, technologies for circular economy, corporate social entrepreneurship, technological solutions for green business transformation, smart home solutions, Industry 4.0, changing needs and behaviour models of society, green economy, etc.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
