

Special Issue

Urban Transport Network Modeling and Sustainable Maritime Transportation

Message from the Guest Editors

We are calling for papers for a Special Issue of the journal *Sustainability* on research into the urban transport network modeling and sustainable maritime transportation. Urban and maritime transportation systems both include a wide range of activities.

Appropriate modeling of these complex transportation systems and successful control of resources are the keys to developing a more efficient, sustainable, and environmentally friendly transportation operation/management system. The integration of sustainability concerns in urban transportation and maritime transportation management has been regarded as a fundamental component of sustainable development. However, the integration of sustainability is challenging due to the balancing between economic, environmental, and social considerations. Different stakeholders have varied insights on different sustainability dimensions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
