

Special Issue

Sustainable Work Motivation: Increasing Productivity, Work Satisfaction, and Employees' Well-Being

Message from the Guest Editor

The work environment of the current age is characterized by rapid changes, a short-term focus, and frequent reforms. Organizations are dealing with a changing workforce in a global, highly competitive environment. As human resource is the most important asset of the organization, managers see work motivation as an integral part of the performance equation at all organizational levels. The goal of the special issue is to promote research from different perspectives on sustainable work motivation. We encourage submissions of empirical research from any theoretical perspective that fall broadly into one of the following areas. Submissions in related areas that include valuable discussions in these directions will also be considered:

- The effects of the pandemic and work-from-home on work motivation
- The cognitive and physiological processes underlying work motivation
- The effects of motivation in well-being and work satisfaction
- Field experiments on work motivation
- Practical interventions and remedies aimed at increasing motivation
- Generational differences in work motivation

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
