

Special Issue

New Technologies for Sustainable Cultural Heritage Tourism

Message from the Guest Editors

In this Special Issue, the focus is to present development models and applications, which rely mostly on new technologies and are addressed to tourists for helping them understand cultural heritage sites in all these dimensions. They may also address the needs of local cultural curators, tour operators, and inhabitants by inspiring and educating them with new approaches for handling visits in cultural heritage sites and their surrounding area; by ensuring environmental and socioeconomic sustainability; and by respecting, embracing, and projecting local traditions. More specifically, the applications and methodologies relying on new technologies may be based on the following topics of interest, but are not limited to:

- Cultural heritage sustainable tourism development;
- Sustainable economic prosperity and job sustainability in a touristic area;
- Intangible cultural heritage and tourism;
- Environmental sustainability in touristic cultural heritage sites;
- Educational applications for tourists and local curators and inhabitants;
- Ecotourism in cultural heritage sites.

Guest Editors

Dr. Georgios D. Styliaras

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
