

Special Issue

Land Management and Sustainable Agricultural Production

Message from the Guest Editors

There is growing awareness and science-based evidence of the on- and off-site adverse impacts of intensive agriculture on the environment. This calls for concerted efforts from all quarters including farmers, advisory services, researchers and policy makers to facilitate adoption of environmentally friendly farming practices without compromising food, fodder and energy production. To facilitate the process, this special issue is inviting high quality and original manuscripts on cropping systems, crop rotations, agroforestry and other relevant production systems that enhance efficient resource (radiation, nutrients and water) use and food, fodder and energy production without adverse impacts on environment. Manuscripts that highlight enhanced environmental performance in terms of provision of ecosystem services are also welcome as are articles that showcase successful uptake of sustainable land management practices and production systems due to innovative knowledge transfer tools and activities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
