

Special Issue

Conservation and Sustainability of Forest Biodiversity

Message from the Guest Editor

Biodiversity plays an important role in sustaining forest ecosystem function and services, and their relationships have become interesting topic in recent years. However, there is still many unclear mechanisms in exploring effects of different biodiversity attributes on ecosystem function, which can provide positive suggestions for forests ecosystem sustainable management. Therefore, the special issue focuses on conservation and sustainability of forest biodiversity and function. Welcome to the study on changes of plant and soil microbial diversity in the different forest ecosystem, the relationship between biodiversity and ecosystem functioning, and effect of management on diversity and function of primary forest and plantation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
