Special Issue

Design of Architectural Sustainable Lighting

Message from the Guest Editor

Given the importance of lighting in our everyday lives, the extent and the multifaceted nature of light-related issues in the built environment, consistent and multidisciplinary discussions are rather necessary among lighting designers, policy makers, health industry, computer scientists, electrical engineers, and so forth. To that end, this Special Issue, "Design of Architectural Sustainable Lighting", provides a platform for exchange of knowledge and current status of the design, research, development, engineering experiences, and law regarding sustainable light and lighting issues, covering visual, environmental, social, and economic dimensions and requires a multidisciplinary approach in order to advance in these and related areas.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
