Digital Technology Supports for Sustainable Development of Human Society during and Post-pandemic Contexts

Message from the Guest Editors

As the world confronts immense challenges from the coronavirus disease 2019 (COVID-19) pandemic, societies all around the globe are dealing with dramatic changes in people's daily life. In the business world as well, the COVID-19 crisis has created unexpected challenges for customers, businesses, and policymakers. Hence, understanding COVID-19's effects on the sustainable development (i.e., continuous transformation) of enterprises and industries is vital. Against such a backdrop, information technology and intelligence applications are responsible for the recent "digital transformation" that is frequently used to signify the influence of an array of technologies on social functions and business activities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
