

Special Issue

Environmental Evaluation of the New Forms of Mobility: Electric, Shared, Autonomous

Message from the Guest Editor

We are calling for papers for a Special Issue of the journal *Sustainability* on research to shed light into the environmental impacts of the so-called new forms of mobility. Proposed papers for this Special Issue may analyze how impacts of shared mobility can change or not if migrating to a different car fleet and how this would impact on the environment, concerning the entire life cycle of the transport system. Papers should concern whether and how the adoption of electric and autonomous vehicles could impact air quality and which effect it could have on climate change (expected impact on global GHG emissions).

Guest Editor

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
