

Special Issue

Sustainable Food - Impact on Public Health, Environment and Industry

Message from the Guest Editor

More often than not, in the recent past, food production for humans has been discussed in great detail, including different dimensions of environment, health, and economics. Without a doubt, one can accept and acknowledge that the human population during the 20th century had the privilege to utilize natural resources without any limits and little attention to its sustainability. Whereas, the scenario is different now, with the massive demand for natural resources and its impacts on the environment have severely constrained every aspect of human life. Food production needs to be stepped up with the available resources for the ever-increasing global population combating the most challenging issue of global warming. With this background, it is evident that food researchers and the food industry have to come up with sustainable solutions in the production and processing of food to uphold food security and human health. Articles accepted in this special issue may increase awareness among the researchers, policymakers, industry, and global citizens for sustainable agriculture and food production.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
