

## Special Issue

# From Global to Glocal: Digital Transformation for Reshoring More Agile, Resilient and Sustainable Supply Chains

### Message from the Guest Editors

Nowadays, the persistent uncertainty of the evolution of the health situation due to the pandemic and the increasing geopolitical tensions are causing new fragilities in global supply chains, which require the elaboration and implementation of unprecedented plans to control and mitigate the damages resulting from the ongoing disruptions. Never before have decision-makers had to change their strategies for managing global supply chains at risk so abruptly to consider the impacts of disruptions on international trade flows. In this context, it becomes necessary to identify alternative sources of supply to enhance regional natural, circular and bio-based resource production, thus reorganizing the boundaries of global chains and making them more agile and resilient. This Special Issue aims to fill a gap in the literature that calls for further study and analysis on the reconfiguration strategies. We welcome studies that investigate how such paradigm shifts can boost process, product and business model innovation, always from a sustainability (environmental, economic, social and technological) perspective.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
