

## Special Issue

# Green Deal Strategies towards Sustainability of Water, Raw Materials and Energy

### Message from the Guest Editor

Green Deal Strategies (GDSs) have dynamically developed in recent years as a response to the progressive climate change worldwide. The main objective of the GDSs is to improve citizens' well-being by integrating environmental, economic and social aspects in all economic activities. Therefore, the GDSs can be indicated as tools for the achievement of Sustainable Development Goals (SDGs). The SI aims to provide an important contribution by presenting the state-of-the-art in the realisation of Green Deal Strategies through an inventory of multidisciplinary knowledge with high scientific and practical importance, which can contribute to improving the quality of the environment and achieving a balance between human activities and nature. We invite research papers, critical reviews or case studies that are relevant to the Green Deal Strategies regarding water, raw materials and energy.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
