

Special Issue

Advances in Heavy Metals Contaminated Soil Management for Sustainable Agriculture and Environment

Message from the Guest Editors

The heavy metal pollution of soil has become a global ecological and environmental concern. It is of great importance to develop cheaper, environmentally friendly and sustainable approaches to manage and rehabilitate heavy-metal-contaminated soils. In this Special Issue, original research articles as well as review articles are welcomed. Research areas may include the following:

- Recent technologies for sustainable soil remediation and rehabilitation;
- Efficient management of heavy-metal-contaminated soils using sustainable and greener technologies;
- Immobilization of heavy metals in contaminated agricultural soils for better crop production;
- Ecological risks associated with heavy metal uptake by crops and its management;
- Stabilization of industrial, mining, and urban contaminated soils;
- Designing biochar-based adsorptive materials for the efficient immobilization of heavy metals in contaminated soils;
- Pollution indexing and health risk assessment of soil heavy metals at contaminated sites;
- Synthesis and design of new immobilizing agents for the immobilization and rehabilitation of metal-contaminated soils, improving their quality.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
