

Special Issue

The Influence of COVID-19 on Sustainable Economy

Message from the Guest Editors

In this moment, the world's biggest challenge is also one of the highest natural and social risks—Covid 19, which is threatening to become the highest disaster in recent history. Social and economic turmoil associated with disasters, especially with the coronavirus pandemic, has wide-ranging and severe impacts on financial markets, including stock, bond, and commodity (including crude oil and gold) markets and almost all social spheres. Covid-19 has reduced consumer spending that could affect a country's services sector. In OECD's March report on the economic growth of all economies, OECD downgraded growth forecast from its 2020 initial forecast. As a consequence, all major financial institutions across the globe cut their forecasted statistics. The scope of this issue is to analyze the impact of Covid-19 on different spheres of economy. The purpose of this Special Issue is to offer an adequate methodology for measuring, analyzing, and preventing the impact of such crises on the economy. This issue will assist in the development of literature of crisis analysis and prevention in the wider economy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
