

Special Issue

Sustainable Last Mile Delivery and Returns on E-Commerce Market

Message from the Guest Editors

This Special Issue aims to discuss the role of sustainable last mile delivery and returns on the e-commerce market from various stakeholder perspectives. Sustainable city logistics of last mile delivery and returns on the e-commerce market are playing an increasingly important role. According to the C3 Solutions report, e-commerce has become one of the biggest problems in the supply chain in the 21st century (Braun, 2018). In just five years, from 2012 to 2017, the number of people making purchases over the Internet around the world has increased by more than 200% (Global Web index, 2018). Since COVID-19 has been occurring globally, the number of e-customers has become even more significant. We invite you to submit papers from various disciplines that will contribute to this Special Issue. We are looking for both research papers and comprehensive reviews related to sustainable last mile delivery and/or returns from the e-commerce market from various stakeholder perspectives. Research related to the impacts of COVID-19 on sustainable e-commerce delivery are also very welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
