

Special Issue

Toward Sustainability: Supply Chain Collaboration and Governance

Message from the Guest Editors

What can firms do, and how, to improve environmental and social performance within their supply chains? This Special Issue aims at contributing to the sustainability literature by answering this research question. In particular, we are interested in manuscripts that focus on the development, management, and governance of inter-organizational collaborative programs aimed at achieving the goals of sustainability. Covered topics include, but are not limited to, the effectiveness of various collaborative activities (e.g., supplier investment/training, co-process/product innovations, performance incentives), the effectiveness of control/governance mechanisms (contract, relationship) adopted to guide and monitor sustainable supply chain collaboration, the cross-country/culture comparison of sustainable supply chain collaboration and governance, etc. Manuscripts that present novel discussion on recent developments, applications, and methodologies in the relevant areas are invited. Preference will be given to those studies that investigate multiple-tier, extending beyond dyadic, supply chain and global sustainability collaboration and governance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
