

## Special Issue

# Effects of the COVID-19 Pandemic on Natural Resource Markets

### Message from the Guest Editor

Since lockdown regulations related to the COVID-19 pandemic often restricted business hours and the number of customers entering shops, as well as forcing strict social distancing, the pandemic had a devastating influence on restaurants and bars. It has been suggested that certain food demand has dropped related to the decline in shops continuing their business during the pandemic. Investigating how such demand shocks in the food industry related to the pandemic is a crucial issue. Furthermore, the lockdown has also influenced energy demand since human mobility has been restricted and more people have spent their time in their homes. All these changes in consumer demand are likely reflected in prices of natural resources: agricultural, energy, mineral, water, etc. However, there are still few studies investigating how the COVID-19 shock has influenced the natural-resource markets. To shed light on this issue, this Special Issue seeks to gather studies focusing on various regions and those examining the impacts of the pandemic on various natural resources. Studies comparing situations of various regions are also welcomed.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
