

Special Issue

Advanced Oxidation Processes and Bioremediation Strategies for the Treatment of Polluted Environmental Matrices

Message from the Guest Editor

The increasing number of pollutants in environmental matrices means that multiple remediation technologies are constantly required to evolve and also requires interdisciplinary collaboration among chemists, biologists, engineers, eco-toxicologists, and environmental scientists. There are no valid evaluation criteria for all cases; on the contrary, every situation must be examined to identify the appropriate initiatives to be taken. Based on the type of treatment, it is possible to distinguish chemical–physical treatments and biological treatments. This Special Issue invites the submission of original research papers, as well as reviews focused on various innovative and sustainable environmental applications for the remediation of contaminated environmental matrices through chemical or biological strategies. Potential topics of interest for this Special Issue include, but are not limited to, kinetics and degradation studies of pollutants, the identification of by-products, the environmental fate of pollutants, catalytic and photocatalytic materials, reactors, eco-toxicological assessments, lab-scale experiments and on-field studies...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
