

Special Issue

Psychological and Behavioral Aspects of Sustainability

Message from the Guest Editor

Achieving environmental, cultural, economic, and social sustainability is predicated on changing human behavior; the purview of Psychologists. For instance, research based in cognitive, social, and behavioral psychology has informed initiatives regarding public education and advocacy, framing of messages, decision making, incentive-based regulation, and social marketing. This special issue of *Sustainability* invites scholars to submit theoretical, empirical, and application oriented manuscripts addressing existing or potential contributions of Psychology to the Sustainability Sciences.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
