

Special Issue

Public Policies for Sustainability and Sustainable Public Policies

Message from the Guest Editor

The last resolution adopted by the General Assembly of the United Nations encourages governments and institutions to transform governance and public policies in order to ensure sustainable policymaking to promote sustainable development. The path to achieving the Sustainable Development Goals requires a multilateral effort where governments and public sector, in a broad sense, play an important role. The main goal of this Special Issue is to encourage academics and researchers to share their proposals to design and implement Public Policies for Sustainability and to present novel contributions to the debate on the Sustainability of Public Policies. The Special Issue will collect a set of contributions that provide a frame of reference to offer solutions for the main challenges of a sustainable future. This collection of different approaches, from the public policy point of view, is not only interesting for researchers, but also for society, organizations, institutions, and governments.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
