

## Special Issue

# Risk Mitigation, Vulnerability Management and Resilience under Disasters

### Message from the Guest Editor

Disasters and disaster losses continue to increase and expand in area, value and frequency. The increase in hazards is due to climate change; exposure to hazards is due to the location of spatial developments and their expansion into hazard-prone areas and also to technology-based systemic interconnections; and vulnerability (propensity for losses) increase originates from growing social inequalities, marginalization and poverty, forced migration and the low-risk perceptions of institutions, communities and individuals. The Special Issue will *discuss* the economic, social, cultural, political, behavioral, technological and other processes in producing, increasing and transferring risks; *identify* successful resilience/adaptation practices of institutions, social groups and individuals at all levels in various geographical contexts; *offer* examples of sectoral policies targeting vulnerability and exposure inequalities and dynamics; and *present* significant risk communication efforts in changing risk culture and achieving the alignment of subjective with objective risks.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
