

Special Issue

Exploring of Sustainable Supplier Selection

Message from the Guest Editors

The topic of sustainable supplier selection represents a very up-to-date and important field, especially in the context of supply chain management in general. Although some considerable research has already been done on the topic of sustainable supplier selection, state-of-the-art reviews in the scope of sustainable supplier selection show that there is still much to explore. This Special Issue will focus on exploring decision support methods and frameworks for sustainable supplier selection. We invite contributions focused on assessment theories and practical indices and frameworks for sustainable supplier evaluation, comparison, and selection. Moreover, methods oriented at various locality levels (local businesses, city-wide, nationwide, distributed entrepreneurs) and supplier types will be gladly received. Approaches utilizing multicriteria decision analysis methods are especially welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
