

Special Issue

Sustainable Development of Supply Chains and Systems

Message from the Guest Editors

This issue focuses on the application of new and emerging technology utilization for creating agile and sustainable supply chain systems. Theoretical frameworks supported by case studies, methodologies supported by real data, and industry outlooks are also strongly encouraged. This Special Issue also invites studies that aim at social and environmental wellbeing, with a focus on the utilization of blockchains, smart contracts, and cryptocurrencies. Given that the determination of factors that hinder the sustainability of businesses remains as a viable concern to the discipline, the path to sustainability will not be clearly identified if the impediments are not recognized and mitigated. Therefore, studies focusing on the barriers for sustainability are also welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
