

Special Issue

Application of Information Technology in Sustainable Business, Tourism, and Education

Message from the Guest Editors

In recent years, society is betting on new business, tourism, and educational models that seek to achieve sustainability that meets the needs of the present without compromising the capacities of future generations, guaranteeing the balance between economic growth, caring for the environment, and social welfare. Not only does profitability matter, but the environment also begins to matter. In all this, Information and Communication Technologies (ICT) are playing and will play a leading role. For this reason, this Special Issue requests novel papers in terms of analysis, solutions, and applications of ICT in the search for sustainability in business, tourism, and education, which allow evaluations and achieve the goals pursued with said sustainability. We hope to create a forum where researchers in the domain of information and communication technologies in business, in tourism, and in education can share their results, experiences, techniques, surveys, analyses, and debates on the application of technologies in achieving this purpose. The topics of interest for this Special Issue are not strictly limited to traditional ICT issues.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
