

## Special Issue

# Climate Resilient Sustainable Agricultural Production Systems

### Message from the Guest Editor

Climate change an important environmental issue is a major concern for the agricultural production systems. It is affecting agriculture in a complex wide spectrum through the soil-crop-atmosphere continuum as well as livestock production, lives and livelihoods of producers and consumers. The chief elements of climate change include rising temperature, modified frequency of extreme events, and elevated CO<sub>2</sub>. Crop production is one of the sensitive sectors to climate variability and change. Climate change has affected crop growth, development and yield over the past few decades across the globe directly or indirectly. Direct effects are due to increased CO<sub>2</sub> fertilization which leads to higher photosynthetic rate and water use efficiency. Indirect effects include crop responses to variability in temperature or rainfall. It is imperative to design strategies which could minimize the impacts of climate change on agricultural production systems and bring sustainability in the system by considering water-food-energy nexus.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
