

## Special Issue

# Sustainability and Agricultural Economics

### Message from the Guest Editor

Agricultural economics is aimed at achieving objectives related to economic growth, environmental impact, and national security. In recent years, due to exponential population growth, increased food consumption, and greater impact on the environment, agricultural economics is facing major challenges. The Special Issue *"Sustainability and Agricultural Economics"* is meant to address a wide spectrum of issues related to these challenges. Researchers are invited to submit manuscripts showing how their research results contribute to solving the current and foreseeable problems that arise from the current dynamics in the world of agriculture. Agricultural policies designed to deal with the global economy and focusing on geopolitical influences as well as policies related to more limited geographical circumscriptions (regional, national or local) can be suitable topics of research. More details at: [https://www.mdpi.com/journal/sustainability/special\\_issues/sustainability\\_agricultural\\_economics](https://www.mdpi.com/journal/sustainability/special_issues/sustainability_agricultural_economics)

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
