

Special Issue

Teacher Training in Active Methodologies for Ecosystem Learning

Message from the Guest Editors

The inclusion of Information and Communication Technologies (ICT) in our globalized world has caused different deep and fast changes. Especially in the educational field, new digital training contexts are being established and creating a need to change the teaching and learning process in relation to current challenges. For this, it is so relevant to implement innovative actions where the use of ICT is combined with active methodologies. With this Special Issue, we intend to cover empirical evidence about how Higher Education and the educational praxis is formulating the training of future teachers and to identify good teaching practices that lead to innovation in the classroom through ICT and teaching and learning methodologies focused on students. **Keywords**

- Information and Communication Technologies
- active methodologies
- innovation actions in education
- teacher training
- ecosystem learning

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
