Sustainability and Territorial Project Assessment

Message from the Guest Editor

Beyond an “environmental impact assessment” approach, the issue to define effective metrics and methods in order to perform the assessment of territorial transformations represents an incomplete contribution of territorial sciences to policy making processes at any territorial scale. The ambition to identify “the best” methodology or “the best” set of indicators, relevant for any specific field of application, is far from being intended as an objective to be reached. However, the effort to perform robust case study applications oriented toward delivering project assessment through the elicitation of effects produced in the territorial dimension, benchmarking sustainability principles adopted under international agreements, represents a challenging interdisciplinary research domain. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
