

Special Issue

Transformation into Environmentally Sustainable Production

Message from the Guest Editors

Production activities impact our common environment and the global climate. Following a further positive development in living conditions, wealth, and health, production activities are expected to continue to increase globally. This trend is reinforced by an increased population. Meanwhile, we need to take action to radically decrease the human environmental impact on our planet to ensure appropriate living conditions for future generations. As production has an environmental impact through its energy and materials usage, a transformation into environmentally sustainable production is urgently needed. We need to make more with radically less use of energy and other resources, as well as transform production to a circular one. This Special Issue aims to publish high-quality research papers on the interdisciplinary field of transformation into environmentally sustainable production. It has a production system focus, targeting operations as well as development of production systems, including management processes, organizational measures, and technology use. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
