

# Special Issue

## Urban Sustainability Futures

### Message from the Guest Editor

The purpose of this Special Issue in the journal of *Sustainability* (ISSN 2071-1050) is to consider future 'utopias' for cities based on human impacts on the urban environment. Authors are asked to envision the optimal future relating to their areas of (urban) expertise and relate these to long-term (future) temporality. They are asked to contemplate the question: What would you change in the city if it helped to achieve sustainability? A wide range of topics can be encapsulated in this approach within the auspice of an integrated (environmental) sustainability. Other spatial scales can also be accommodated here based on multiscale and integrated approaches; and cross-temporal approaches are also well-suited to this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
