Wetland Ecohydrology: Restoration of Contaminated Wetlands in Sustainability

Message from the Guest Editors

Wetlands is an important component of the surface earth system. Their function through strong interactions between hydrology and ecology, and thus are central environments for ecohydrological research. With rapid economic and social development and global climate change, the pressure on the environmental status and ecological security of the wetlands is increasing. To comprehensively understand the environment conditions of the watershed ecosystem, we set this issue to raise concerns and update significant changes, knowledge, and technologies relevant to monitoring, integration, evaluation and restoration of the contaminated wetlands, which will provide a scientific basis for the criterion and restriction of human activities, raising community awareness of the environment and enhancing the implementation of regional sustainable development strategies and policies and measures.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
