Special Issue

Advances on Engineering Graphics: Improvements and New Proposals

Message from the Guest Editor

This Special Issue invites researchers to submit original research papers and review articles related to any discipline in which theoretical or practical issues of engineering graphics are considered. The topics of interest include but are not limited to:

- Engineering graphics
- Computer-aided design
- Industrial design
- Industrial drawing
- Geometric modelina
- Virtual reality
- Augmented reality
- Technical drawing
- Descriptive geometry
- Computer animation
- Multimedia

Contributions in other domains are welcome, although we ask that you please contact the .

About the Journal

Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
