

## Special Issue

# Symmetry beyond the Standard Models of Cosmology, High Energy Physics and Quantum Field Theory II

### Message from the Guest Editor

The purpose of this Special Issue is to present topics of current interest and provide a stimulating environment for scientific discussion on new developments in theoretical and experimental high energy physics and physical programs for future colliders, as well as to answer questions on the standard model of electroweak and color interactions and the cosmological standard model. This Special Issue is the second edition of “Symmetry beyond the Standard Models of Cosmology, High Energy Physics and Quantum Field Theory” ([https://www.mdpi.com/journal/symmetry/special\\_issues/symmetry\\_beyond\\_standard\\_models\\_cosmology](https://www.mdpi.com/journal/symmetry/special_issues/symmetry_beyond_standard_models_cosmology)).

### Guest Editor

Prof. Dr. Maxim Yu. Khlopov

1. Director of Virtual Institute of Astroparticle Physics, Paris, France
2. National Research Nuclear University MEPhI, President of Center for Cosmoparticle Physics Cosmion, Main Researcher of Research Institute of Physics of Southern Federal University, Rostov-on-Don, Russia

### Deadline for manuscript submissions

closed (31 May 2024)

## About the Journal

### Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, CAPlus /  
SciFinder, Inspec, Astrophysics Data System, and other  
databases.

#### Journal Rank:

JCR - Q2 (Multidisciplinary Sciences) / CiteScore - Q1  
(General Mathematics)
