# **Special Issue**

# Selected Papers Symmetry 2021—the Third Edition of the International Conference on Symmetry

# Message from the Guest Editors

Participants of this conference are cordially invited to contribute a full manuscript to our Special Issue "Selected Papers: Symmetry 2020-The Third Edition of the International Conference on Symmetry" in the journal *Symmetry*. We would like to select a number of lectures from the conference to contribute to this Special Issue in the journal symmetry. Among these, five papers will be seleted to be free of charge, while all other selected contributions will have a 20% discount on the on the publication fees. The Special Issue will have representation from all the disciplines participating in the conference where the notion of symmetry plays an important role. Special attention will be paid to interdiciplinary contributions. This themed collection will be closely aligned with the scope of the event. The submission deadline for this Special Issue is 22 April 2021. Symmetry is indexed by the Science Citation Index Expanded (Web of Science), MathSciNet (AMS), Scopus and other databases, and has an Impact Factor of 1.457 and a 5-Year Impact Factor of 1.323 (Journal Citations Reports, 2016).

# **About the Journal**

## Message from the Editor-in-Chief

Symmetry is ultimately the most important concept in natural sciences. It is not surprising then that very basic and fundamental research achievements are related to symmetry. For instance, the Nobel Prize in Physics 1979 (Glashow, Salam, Weinberg) was received for a unified symmetry description of electromagnetic and weak interactions, while the Nobel Prize in Physics 2008 (Nambu, Kobayashi, Maskawa) was received for the discovery of the mechanism of spontaneous breaking of symmetry, including CP symmetry. Our journal is named *Symmetry* and it manifests its fundamental role in nature.
