

## Special Issue

# The Application of a Large Language Model (LLM) in Education Reform and Innovation

### Message from the Guest Editors

Large language models (LLMs), such as ChatGPT, represent cutting-edge generative AI technology with diverse applications in education. These systems support areas like curriculum design, data-driven teaching decision-making, evaluation, optimization, talent cultivation, and teaching innovation. LLMs are instrumental in promoting evidence-based curriculum design and teaching management, serving as a key link in education innovation. Their ability to analyze and process vast amounts of data provides a strong foundation for technological advancements and the development of high-quality, effective educational systems. Integrating LLMs into teaching processes enhances operational efficiency, teacher effectiveness in using data tools, and scientific proof for education strategies. Continuous reform and innovation in LLMs ensure they remain a driving force in advancing educational practices and fostering meaningful improvements in teaching quality and innovation.

### Guest Editors

Dr. Feng Zhang

School of Mechanics, Civil Engineering and Architecture, Northwestern Polytechnical University, Xi'an 710129, China

Dr. Shuo Zhao

School of International Studies, Communication University of China, Beijing 100024, China

### Deadline for manuscript submissions

20 August 2025

## About the Journal

### Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
