

## Special Issue

# Greenways and Sustainable Urban Mobility Systems

### Message from the Guest Editor

The aim of this Special Issue is to evaluate the impact of greenway development on urban mobility through using system principles, analyzing the dynamic interactions between socio-economic, environmental, and urban planning systems in the context of greenway integration, and assessing the synergy between greenways and existing transportation systems. We are seeking articles investigating different approaches to the integration of greenways and sustainable urban mobility as a comprehensive solution. We also welcome papers examining previous studies on greenway development and how it relates to sustainable urban mobility. Finally, we will analyze successful case studies from around the world and identify the key factors contributing to their success. This Special Issue will also present system-level policy recommendations, taking into account the interconnectivity of various urban components, and act as a guide in light of the dynamic changes in the urban environment. It will provide valuable insights into the transformative potential of greenways for sustainable urban mobility. ## About the Journal

### Message from the Editor-in-Chief

*Systems* is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
