

Special Issue

Navigating Digital Transformation: Leadership and Decision Making in Today's Systems

Message from the Guest Editor

Digital transformation is revolutionizing the way organizations operate, requiring leaders to navigate complex technological landscapes and make critical decisions to ensure their success in today's ever-evolving systems. This Special Issue "Navigating Digital Transformation: Leadership and Decision Making in Today's Systems" in MDPI Systems invites contributions that explore the intersection of leadership, decision making, and digital transformation. This Special Issue aims to provide a platform for researchers and practitioners to discuss and analyze the challenges and opportunities that come with leading organizations through the digital transformation journey. We invite submissions that examine the role of leadership in driving digital initiatives, the strategies and processes involved in decision making in the digital age, and the impact of digital transformation on organizational structures and practices. We encourage submissions from a wide range of disciplines, including but not limited to business, management, information systems, and technology. About the Journal

Message from the Editor-in-Chief

Systems is a leading venue for the quick and global dissemination of results of cutting-edge research in various areas of systems science and systems-related fields. An increasing number of researchers are realizing the enormous potential of systems thinking in managing the many unprecedented and complex issues in all areas of need. The *Systems* journal provides a home of exceptional quality for the manuscripts of these researchers who often find it difficult to publish their work in conventional discipline focused journals.

Editor-in-Chief

Prof. Dr. William T. Scherer

Chair, Department of Systems and Information Engineering, University of Virginia, Charlottesville, VA 22904, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SSCI (Web of Science), dblp, and other databases.

Journal Rank:

JCR - Q1 (Social Sciences, Interdisciplinary) / CiteScore - Q2 (Modeling and Simulation)
