Thalassemia Reports

MDPI

Message from the Editor-in-Chief

Our journal includes people who have made a relevant contribution to thalassemia management and research. The main goal of this open-access journal was to cover research with two crucial aims.

The first was to give a voice to all groups working in developing countries where thalassemia and haemoglobinopathies are most common and where the progress for the control and management of these diseases have been more impressive and relevant.

The second was to provide room for the Association of Thalassemia Patients. This was one of the reasons why *Thalassemia Reports* published recommendations and papers submitted by the Thalassemia International Federation.

The challenge for the next years will be to highlight the amazing changes in the treatment of these diseases, looking at all the innovative treatments that are being delivered to patients.

Editor-in-Chief
Prof. Dr. Aurelio Maggio

Aims

Thalassemia Reports (ISSN 2039-4365) is an international open access journal on the study, diagnosis, and treatment of thalassemia. The journal covers the pathophysiology, diagnosis, classification, and treatment of thalassemia and related disorders for physicians and medical scientists. The primary intent of the journal will be to publish clinically relevant information that will directly improve the care of patients with thalassemia. Basic science studies of interest to those treating disorders will also be considered for publication when relevant. Specific case reports are also welcome, within detailed clinical pictures of patients withholding the disease.

Scope

- Thalassemia diagnosis
- Thalassemia therapy
- Epidemiology and prevention of thalassemia
- Molecular pathology and pathophysiology of thalassemia
- Thalassemia-related disorders

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Coverage by Leading Indexing Services

ESCI (Web of Science), Embase, and other databases

Rapid Publication

A first decision is provided to authors approximately 33.9 days after submission; acceptance to publication is undertaken in 8.1 days (median values for papers published in this journal in the first half of 2024)
