

## Special Issue

# Quantitative Imaging Network

### Message from the Guest Editors

The National Cancer Institute's Quantitative Imaging Network (QIN) promotes research, development and clinical validation of quantitative imaging tools and methods for the measurement and prediction of tumor response to therapies in clinical trial settings; ultimately, its overall goal is to facilitate clinical decision-making. Projects include the development and adaptation/implementation of quantitative imaging methods, imaging protocols, and software solutions/tools, and application of these methods in the context of the standards of care patient management and in clinical therapy trials.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Emilio Quaia  
Department of Radiology, University of Padova, University of Padova,  
35100 Padova, Italy

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

##### Journal Rank:

JCR - Q2 (Radiology, Nuclear Medicine and Medical Imaging)
