

Special Issue

Concentration of VOCs in the Atmosphere and Its Environmental Exposure

Message from the Guest Editors

This Special Issue aims to compile research that enhances our understanding of volatile organic compounds (VOCs) in the atmosphere, emphasizing their concentrations, distributions, sources, and human health impacts. Key areas of interest include the following:

- Source identification
- Exposure assessment
- Health risk evaluation
- Environmental impact

While substantial research has been conducted on VOC emissions and their impacts, this Special Issue seeks to bridge gaps by focusing on interdisciplinary studies that connect environmental measurements with health risk assessments. By compiling articles that offer novel insights into VOC concentrations and exposure risks, this Special Issue aims to advance current understanding and inform future research directions and policymaking. We encourage submissions that present original research, reviews, or case studies related to the outlined themes, with the goal of fostering a comprehensive discourse on atmospheric VOCs and their environmental exposure.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
