

Special Issue

Toxicity of Central Nervous System (CNS) Modulators

Message from the Guest Editors

The main focus of this Special Issue is to identify the toxicological effects of drugs that are considered modulators and can be used to treat diseases and disorders associated with the central nervous system. The Special Issue also focuses on the toxicological effects of drugs of abuse that affect the CNS. These drugs of abuse include ethanol, cannabis, psychostimulants (e.g. methamphetamine, cathinone, cocaine and others), opioids, and nicotine, as well as other synthetic drugs (heroin, balt salt, etc.) and other illicit drugs. This Special Issue seeks research articles that mainly investigate the toxicological effects of CNS modulators in acute and chronic paradigms. CNS modulators include approved medications and illicit drugs. We invite investigators from different research areas to present their studies on the toxicological effects of CNS modulators which can be illicit and non-illicit drugs that have modulatory effects in the brain. We also encourage investigators to submit review articles or method research articles centered around the toxicity of CNS modulators.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
