

Special Issue

Ototoxic Chemical Exposures and Public Health

Message from the Guest Editors

The 2021 World Report on Hearing by the World Health Organization identified exposure to ototoxic chemicals as one of the preventable causative factors to hearing disorders across one's life course. The report also included exposure to these agents among the risk factors that need to be addressed to limit the burden of the condition across the world. Detection, diagnosis and management of ototoxicity continue to be a challenge worldwide. We encourage submissions to this Special Issue concerning the mechanism of action of ototoxic chemicals, ways in which auditory and vestibular damage manifests in an individual, approaches to the early detection of auditory and vestibular disorders, diagnosis, treatment, and prevention of auditory disorders caused by environmental or occupational exposure to ototoxic chemicals.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa
Department Environmental Chemistry, IDAEA-CSIC, Jordi Girona 18,
08034 Barcelona, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
