

## Special Issue

# Eco-Environmental Risks of Emerging Pollutants and Their Relationships with Climate Change

### Message from the Guest Editors

This Special Issue invites a broad range of theoretical, systematic, and technical analyses with respect to the following key areas:

- Microbial responses to emerging pollutants under climate change: Studies should investigate how emerging pollutants such as microplastics and PFAS impact microbial communities in diverse environments, such as soil, water, and sediments. Research should examine how these impacts disrupt ecosystem processes, including nutrient cycling and greenhouse gas emissions.
- Interactions between emerging pollutants and climate-induced environmental stressors: Research should explore how climate-induced changes, such as increased temperatures and altered precipitation patterns, affect the behavior and toxicity of emerging pollutants such as antibiotics and nanomaterials. This includes assessing their subsequent effects on environmental and human health risks.
- Impact of emerging pollutants on biogeochemical cycles: This includes examining how emerging pollutants influence microbial-mediated processes such as nitrification, denitrification, and carbon mineralization, and their overall impact on carbon and nitrogen cycles.

---

### Guest Editors

Prof. Dr. Jingchun Tang

Dr. Linan Liu

Prof. Dr. Shakeel Ahmad

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
