

## Special Issue

# Human Biomonitoring and Exposure Assessment of Environmental Contaminants

### Message from the Guest Editors

This special issue acknowledges the wide range of environmental contaminants, from persistent to non-persistent, and their potential to cause adverse health effects in the short and long terms. The issue highlights the need for comprehensive human biomonitoring and exposure assessment methods that address all aspects of environmental stress - chemistry, physical and social. It aims to draw attention to vulnerable populations around the world who are disproportionately affected by environmental pollutants. The special issue will contribute to existing studies by highlighting the diverse nature of environmental exposures and their different temporal effects on health. Emphasise the importance of the protection of vulnerable populations and the need to address the specific challenges they face in relation to environmental exposures. Encourage research that is inclusive and involves populations that are often under-represented or neglected. If you need further assistance or specific descriptions for any of these topics, feel free to ask!

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
