

Special Issue

Editorial Board Members' Collection Series: Advanced Oxidation Processes of Organic Contaminants

Message from the Guest Editors

Organic pollutants are becoming an increasingly critical threat to ecosystems and human health, resulting in a growing body of research and resources. With the increasing need for environmental measures, such as sustainable development goals and carbon neutrality, efficient and high-purification technologies for wastewater treatment are indispensable. Therefore, it is important to develop innovative advanced oxidation technologies based on new ideas. The editors of this Special Issue encourage all interested authors to submit their best manuscripts related to organic pollutant removal by various advanced oxidation techniques. The aim is to improve the knowledge within this field, as well as to open new views and perspectives on this topic.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Editor-in-Chief

Dr. Demetrio Raldúa

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
