

## Special Issue

# Characteristics, Sources, Occurrence and Toxicological Mechanisms of Environmental Pollutants in Aquatic Systems

### Message from the Guest Editors

This Special Issue will cover the latest research on aquatic toxicology, including toxicity tests for pollutants, the development and application of biomarkers, and chronic and acute toxic effects after exposure to pollutants. Advances in environmental monitoring will include detection technologies for emerging pollutants, standardization and automation of environmental DNA monitoring technologies, and how these assessment methods and monitoring technologies can be applied to practical water environment management and protection strategies.

### Guest Editors

Prof. Dr. Desheng Pei

## About the Journal

### Message from the Editor-in-Chief

*Toxics* (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
