Electronic Cigarettes and Heated Tobacco Products Aerosols Emission and Toxicity Evaluation

Message from the Guest Editors

Electronic nicotine delivery systems (ENDS), including electronic cigarettes and heated tobacco products (HTP) have been gaining popularity as a safer alternative to tobacco products, generating conflicts over the appropriateness of their use as a smoking cessation tool. The interest in public health and regulatory policies about the toxicological aspect and the emissions of vapor products has increased worldwide. Particularly, scientists and regulators are sensitive about their impact on youth and adolescents. However, none of the published studies are conducted using standard and appropriate methods producing faulty results, and so there are consequent detrimental effects on health and social care practices. This issue calls for original research articles or review articles presenting quantitative and/or qualitative results about the toxicity of ENDS. The aim of this Special Issue is to provide consistent and reliable data to properly inform policy and regulatory authorities in order to provide fair and correct regulation of these devices.

About the Journal

Message from the Editor-in-Chief

Toxics (ISSN 2305-6304) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to all aspects of toxic chemicals and materials. We aim to publish high quality work that furthers our understanding of the exposure, effects, and risks of chemicals and materials in humans and the natural environment as well as approaches to assess and/or manage the toxicological and ecotoxicological risks of chemicals and materials. Please consider publishing in *Toxics* when preparing your next paper.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Chemical Health and Safety)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.3 days after submission; acceptance to publication is undertaken in 2.3 days (median values for papers published in this journal in the second half of 2024).
